

13. The method of claim 11 for producing a first generation hybrid soybean seed wherein a soybean plant produced by growing the seed of soybean variety 92B84 is the female parent.
14. The method of claim 11 for producing a first generation hybrid soybean seed wherein a soybean plant produced by growing the seed of soybean variety 92B84 is the male parent.
18. An F_1 hybrid soybean plant, or parts thereof, grown from the seed of claim 17.
20. The method of claim 19 wherein plant breeding techniques are selected from the group consisting of: recurrent selection, mass selection, bulk selection, backcrossing, pedigree breeding, restriction fragment length polymorphism enhanced selection, genetic marker enhanced selection, and transformation.
31. The method of claim 30 wherein plant breeding techniques are selected from the group consisting of: recurrent selection, mass selection, bulk selection, backcrossing, pedigree breeding, restriction fragment length polymorphism enhanced selection, genetic marker enhanced selection, and transformation.
35. The method of claim 31 for producing a first generation hybrid soybean seed wherein a soybean plant having all the morphological and physiological characteristics of soybean plant 92B84 is the female parent.
36. The method of claim 33 for producing a first generation hybrid soybean seed wherein a soybean plant having all the morphological and physiological characteristics of soybean plant 92B84 is the male parent.
39. The method of claim 38 wherein plant breeding techniques are selected from the group consisting of: recurrent selection, mass selection, bulk selection, backcrossing, pedigree breeding, restriction fragment length polymorphism enhanced selection, genetic marker enhanced selection, and transformation.
43. An F_1 hybrid soybean plant, or parts thereof, grown from the seed of claim 42.
